Welcome address

On behalf of the Organizing Committee, we warmly invite you to join us in Tokyo on 7th to 10th June 2017 at the Tokyo Garden Palace for the Joint Congress of the 19th International Symposium on Gnotobiology (XIX ISG), the 50th Congress of Japanese Association of Germfree Life and Gnotobiology (L JAGG) and the 39th Congress of the Society for Microbial Ecology and Disease (XXXIX SOMED).

Our four days of symposia, seminars and free papers will cover recent developments in gnotobiology, basic microbiological research and clinical studies mainly in hematopoietic stem cell transplantation (HSCT). It is our hope that the joint congress delivers the opportunity to develop our understanding of the complexity of microbial ecology and diseases, and to expand the knowledge from the bench to the clinics for accurate diagnosis and better treatment. It provides a unique opportunity for each of us to exchange information, enter into dialogue and become better connected with other people across the world and the different fields of science.

Tokyo is a capital of Japan and known as a city with many tourist spots, historical atmosphere and traditional/modern Japanese cultures.

Tokyo Garden Palace, the venue of the Congress, is located in Ochanomizu, which is an academic area with many universities and institutions in Tokyo.

We are looking forward to welcoming you to Tokyo in June 2017 for the ISG/JAGG/SOMED joint congress.
